My Top Brands

A brand with great attention to their formulations, with products that work well on hair with different characteristics.

In addition to their great quality natural ingredients, they carry a variety of hair and skin products created by them under their brand **Ciocolatina**.

SheaMoisture

A Better Way to Beautiful since 1912

It needs no introduction as it is favourite brand among many naturals. They have a great variety of hair products catering for every need.

Their moisturising conditioner from the Naturals line was my favourite until recently. Their replacement line, Botanique, is not as good but still a good conditioner (use may have a learning curve).

My Top Brands

Flora & Curl™
PURE • PLANT POWER • POTENT

A brand that has their ingredients carefully selected for their nutrient profile and the benefits they bring to your hair. Products are a delight to the senses triggered by a wonderful scent.

A recent discovery, but one I highly recommend for deep conditioning treatments. Look for the Vatika Naturals line.
